

Boston Area Pirate Hunters League

Leaky Ship

Every crewmember has a different suggestion for stopping letters from leaking from the ship. The captain must combine all of these to find a way to stop the leaks for good.

36. Woodwind instrument
38. "Orinoco Flow" artist
40. NY Museum of Art
44. A smart-mouthed alien

[Grid on next page. In the original puzzle, the last three pages were printed on transparencies.]

Navigator (Standard Nurikabe): The navigator has tried using a map of local islands. Each number indicates an island (whitespace) of that size including the number itself. The islands are surrounded by ocean (black space), and cannot be orthogonally adjacent. The ocean spaces must form one contiguous set, but no 2x2 grid area can be entirely ocean.

Tailor: The tailor has just placed eye patches over some parts of the ship.
