

Welcome to BAPHL 14!

BAPHL 14 is an anniversary celebration of the past 13 BAPHLs. We've gotten you thirteen gifts, one for each previous BAPHL – but, of course, you'll have to solve a puzzle to receive each gift. These puzzles are broken into three rounds at three separate locations, consisting of four or five puzzles each.

If you think you've solved a puzzle, you can check your answer with any BAPHL 14 staff member. You must solve **at least three** puzzles at each location before you can move on to the next location. However, there is a location-specific puzzle for each round, so be sure to solve that one before moving on!

Once you've finished at the third location, there will be a metapuzzle which incorporates each of your thirteen puzzle answers. Once you solve this puzzle, you will have finished the hunt, and will receive the final gift!

Good luck, puzzlers! We hope you enjoy the presents we've gotten you!

Sincerely,  
BAPHL 14

## ANOMALY DETECTED:

A space-time paradox has been detected in Boston, Massachusetts. BAPHL 14 has been time shifted from May 2016 to November 2016. The Bureau of Anti-Paradox Historians and Logicians has discovered several changes in the chronology and puzzles of previous BAPHLs due to this temporal displacement event.

Three major temporal anomalies have been identified between 2011 and 2016. Each appears to be associated with a particular set of time-shifted BAPHLs, and we believe the solutions to these anomalies will be critical in restoring the original timeline and avoiding catastrophic consequences.
