

**BAPHL 4 – Limbo Solution**

Start by solving the included Nikoli puzzles. Each is completely normal.

Note that the grids get steadily smaller as you go. Overlay them from smallest to largest, so that you see one additional “ring” of squares per level. The final overlay looks as follows:

You will now need to look at each 3x3 square in the **incorrect Pigpen code from the reference sheet**, as clued by the first letters of each Hell, as well as by the dirty child in the flavortext. Translating each 3x3 square gives the answer **LEONARDO DICAPRIO**.
