

Welcome to Central Square! Have some puzzles!

Alphabet Breakfast Cereal Disaster

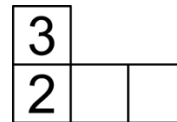

Back to Square One

Completing the Square

Square Pegs

Slitherlink: Draw a single closed loop along the edges of some of the squares in the grid. If there is a number in a square, it represents how many segments of the loop are adjacent to that square. For Metapuzzle 2, puzzle answers from Central Square should be placed in the squares which lie **outside** the loop.
