

Squaring the Square

We're giving you everything you need to square the square. Wait...where'd the small pieces get to?

Cut out the pieces on the second page and arrange them on the grid below, with no pieces overlapping or going outside the grid. Take one word from each square in a row of the grid from left to right to get seven clues, and place a letter in each square so that the answers to those clues are spelled out, one letter per square, in each respective row. There are five missing 1-by-1 squares, which do not contain any clue words, but will be filled with letters.
