

## Metapuzzle 1 solution

Each answer begins with one of the letters F, G, H, or I, and ends with L, M, N, or O, and there is precisely one word beginning and ending with each pair of those, so these answers can be put into the grid according to these characteristics. When this is done, each row and column has a second letter in common among all four answers, and the second common letters spell the location of the second metapuzzle, **AREA FOUR**. (Area Four is both a restaurant in Tech Square and the former name for “The Port,” a subdivision of Cambridge that encompasses most of the locations included in BAPHL 16).
