

GENETICS AND STATISTICS META: "To Be the Very Best"

Eva Lushun, Carmen's Darwinian demon and overseer of odds, has looted our labs and stolen the most important thing to us scientists! Thankfully, our agents have been able to track down a slew of raw data from Eva's latest experiments. Seems like she's betting on the creatures here to conceal what she's copped! The four answers you've learned from the other agents will sort these beasts into a bracket. Use the clues from Eva's notes, and you should be able to puzzle it out!

EVA'S NOTES:

- No point in getting fancy. I'll organize these beasts in orinthological order.
- The most important part of any tournament is the opening round. That's where I'll hide the data I need. **The odds are in my favor!**
And speaking of data...
