

Aquatic Architecture and Development 101

(this is not a puzzle)

GRAD

MBTA: #GreenLine: Shuttle buses replace Green Line service between Medford/Tufts and Lechmere due to unusual construction at Medford/Tufts Square Station. We are pretty sure this makes us a World Class City.

Sunday, August 27

Prof. Cobb DuBois

Welcome to Aquatic Architecture and Development 101!

This course will be a hands-on experience, where you'll learn to construct (and deconstruct) the most modern theories on building facilities in our planet's beautiful waters. Don't worry if you make a mistake; just call it art!

Doolittle still resents not getting into Tufts, or MIT, and clearly is trying to start a feud between them. The Tufts mascot *is* Jumbo the Elephant, so it's not the *size* of the animal that's bothering the community. Before we can begin today's project though, we'll need to contend with one (very large) angry beaver attacking our building.

We devised four practical strategies on how to get this beaver to leave it alone:

Alphablock Soup

Simple Rounds

Stuck Together

Word Wide Web

Word Wide Web uses information inside the Joyce Cummings Center, a new campus building accessible to the community, with indoor seating, free guest wifi, and restrooms.

If your study group is comfortable indoors, note that, while there is plenty of seating in the building, much will likely already be in use by the Tufts community. If your study group prefers to solve al fresco, please designate a member who can take photos and read QR codes to find the location.

Once you have applicable results, we'll collaborate, with:

Building Good Habitats
