

MESSING WITH GEOMETRY

Ariadne: It always seemed like a puzzle space was limited to a page. But now, my question is what happens when you start messing with the geometry of it all...?

Cobb: Careful. The words can tell that something is wrong. The geometry might decide to mess with you. You'd be surprised how many non-overlapping geometric words you've formed by folding up the boards.

Ariadne: What do you mean? They're just words on Boggle boards. It's not like they're going to leave the board and attack us.

Cobb: No. Just you.

The image displays several Boggle boards and various geometric shapes. The Boggle boards are arranged in a grid-like fashion, with some words highlighted in red. The geometric shapes are scattered around the boards, including a cube, a parallelogram, a heptagon, a triangle, a pentagon, a rectangle, an oval, a diamond, a cone, a circle, a square, a sphere, a pyramid, a diamond, a wavy line, a curved arrow, and a straight arrow.

Boggle Board 1 (Top Left):

S	A	H	E
D	R	T	I
C	E	T	E
S	A	P	P

Boggle Board 2 (Middle Left):

R	M	N	G	L	E	O	L
A	L	E	A	I	R	O	I
O	L	O	C	R	N	A	Qu
A	L	N	E	T	S	Qu	A

Boggle Board 3 (Middle Right):

E	L	G	D	R	I	A	D	
R	R	E	N	L	A	R	O	
A	P	C	T	A	T	A	N	
L	A	P	A	R	E	R	R	L

Boggle Board 4 (Bottom Right):

A	O	T	U
B	L	E	N
O	E	I	T
G	R	V	U
